EXPERIENCE

•ITBOX SS

July 2025-Dec 2025

Junior Drupal Developer

Muzaffarpur

- Worked on multiple college websites, customizing Drupal themes and content structures to meet institutional branding and layout requirements.
- Configured and managed Drupal content types, Paragraphs, and Views to build dynamic and reusable content structures, including custom image carousels.
- Developed responsive layouts and custom Twig templates for nodes and paragraphs, applying Bootstrap/Tailwind CSS to align with design specifications.
- Implemented custom styling for content listings and detailed pages, ensuring attractive and consistent UI presentation across the platform.
- Assisted in debugging display issues and optimizing content rendering by adjusting View modes and custom template overrides.

PERSONAL PROJECTS

•Medi-Mitra (Pharmacy Management Application)

A product management, multi-role authentication (Doctor, Nurse, User), shopping cart, and healthcare booking features.

- Node.js, Express.js, MongoDB, React.js, Redux, JavaScript, CSS
 - Developed a responsive pharmacy web platform with secure multi-role authentication, integrated healthcare service modules, and appointment booking—enhancing user experience and streamlining operational workflows.

•Rudra Health (Appointment / Prescription Portal)

Role-based portal for Admin, Doctor, and Patient with appointments, health queries, e-prescriptions, and notifications.

- PHP, MySQL , JS , Html , Css , Xampp
 - Designed a responsive healthcare web app with role-based access for admins, doctors, nurses, and users—featuring secure registration/login, doctor search, appointment management, health queries, and prescription handling.

•Krishak – Farm Marketplace Platform

June 2025

Full-stack farm marketplace web app for buying/selling agricultural products.

- Tools & technologies used: React, Vite, Chakra UI, Node.js, Express.js, MongoDB, Mongoose, REST API, JWT, Tailwind CSS
 - Developed a scalable agri-commerce platform that streamlined product buying/selling, empowered farmers to access broader markets, and reduced seller workload through automated inventory and order management—featuring a user-friendly, category-filtered interface and seamless frontend-backend integration.
